

Made to withstand and impress.  
Bergolin Wood Flooring Coatings.

**BERGOLIN**  
Creating Your Coatings

# Quality and individuality on an international stage.

**Bergolin coating systems for wood flooring set standards in processing, appearance and durability.**

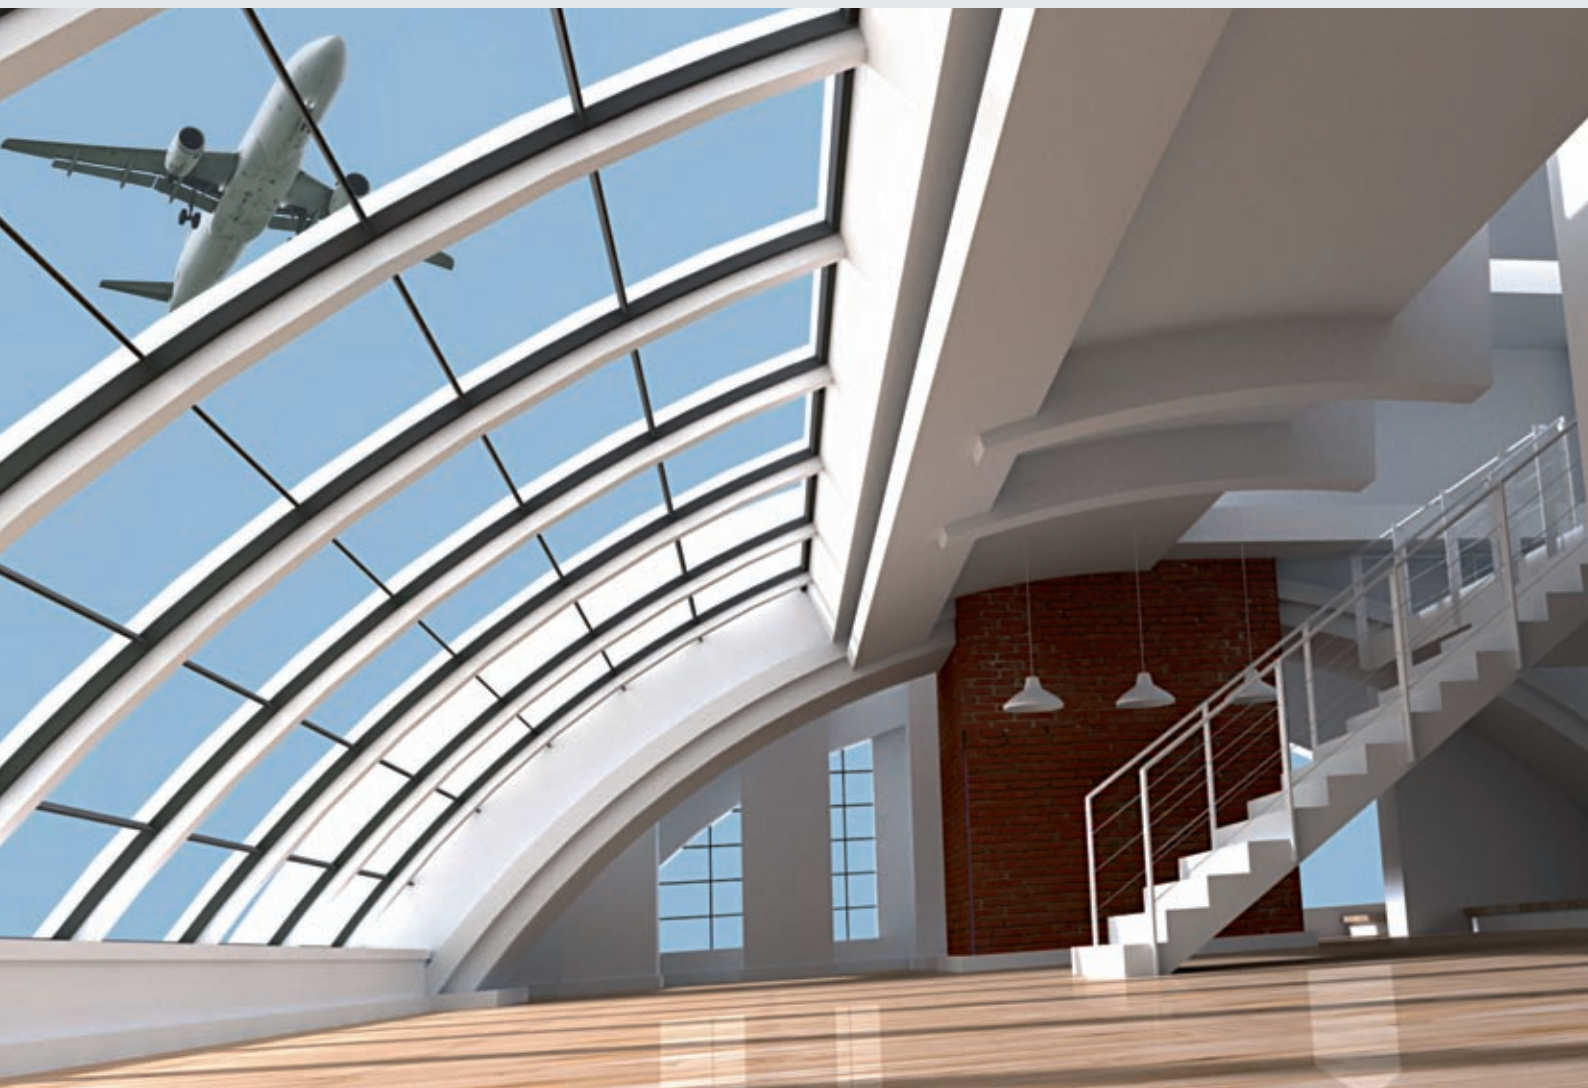

Coating systems for wood flooring should create an exceptionally attractive appearance that can also stand up to toughest use. And they need to fulfil the highest demands with regard to economy and safety in processing.

With many years of experience in industrial coatings for wood flooring along with high-performance products and coating systems, we offer customers throughout the world system solutions which meet the highest demands in quality. With this foundation we are always

able to develop products adapted to meet the needs of the current market situation and the individual manufacturing process.

UV coatings from Bergolin achieve maximum levels of scratch, abrasion and chemical resistance and naturally meet the demands of all common test methods, such as the Coin Test, Falling Sand Test, Taber, DUR-O-Test as well as the adhesive strength requirements according to ISO 2409.

But more than this, we are a partner to customers for all requirements and provide our expertise in both process and plant design.

# Progress in every way.

## **BERGORAD, TERRALUX UV coating systems**

Bergolin's complete product range offers everything from primers to top coats for all layers and types of wood flooring coatings and finishes. These UV-cured coating systems not only achieve a high transparency and lasting brilliance but they also create natural, open or closed-pored surfaces. We can even set the degree of gloss specifically and precisely according to the customer's demands.

BERGORAD and TERRALUX UV coating systems comprise: UV top coats, UV hydro primers and stains, UV putty for light and heavy duty filler machines, UV roller primer (containing corundum), special HAC (high abrasive coatings) top coat systems and special products with nano-effects.

## **TERRALIN natural products**

In line with the market trend towards natural surfaces, the TERRALIN range of products offer air-cured systems for industrial series coating of wood flooring. These coating systems achieve both an attractive appearance and an exceptional surface feeling. Their special "Soft-Feel" finish gives even the most elaborate settings an especially comfortable, living and elegant character.

BERGOLIN wood coatings can be applied using all common methods such as spraying, rolling, pouring, Vacumat® or dipping and can be dried using either traditional methods or modern radiation curing techniques such as UV, IR, NIR, or heat reactor curing and freeze-drying.

# We are Bergolin.

Whether designing surfaces or protecting them - Bergolin is always the perfect partner. This is because, as a medium-sized industrial coatings manufacturer, we not only possess the knowledge and experience, but also have the flexibility to develop and manufacture coatings precisely in accordance with our customers' requirements using state-of-the-art systems and technologies. We are a partner who can react quickly and reliably to global markets and their unique, dynamic challenges.

Together with our subsidiaries, we are developing international markets with our innovations and offer a uniquely versatile range of

high-quality coating systems: from decorative furniture coatings, to coatings for general industry and automotive supplier use, to coating materials for heavy duty corrosion and building protection.

Our products and our development and production facilities adhere to modern technical standards and fulfil the highest quality and environmental protection requirements (ISO 9001/2000). Innovative coating and process engineering technologies combined with compositions that are exceptionally environmentally friendly enable us to effectively align both ecological and economical aspects.
